# AUSSIE MADE GUMBOOTS

Bata gumboots are proudly manufactured at Bata’s Mornington, Victoria factory and have been worn by Australians for decades. Whether for general use in the yard or garden, mining or construction, or simply when it’s wet and wild outside, Bata gumboots will keep you dry, safe and comfortable.

Traditionally PVC gumboots are made from raw compounded PVC pellets via injection moulding machines. Our sustainable Black PVC gumboots are now made from granulated recycled PVC gumboot material via injection moulding machines, and contain no less then 50% recycled content and in some cases up to 100%.

The introduction of recycled PVC content into our production has helped us take a greater step to achieving our environmental goals, which is good news for our planet.
